

Prompt: Reddit Post Classification

You are performing a binary classification task.

Analyze a Reddit post related to an LLM-powered IDE or IDE extension and determine whether it discusses security or privacy issues arising from AI/LLM integration in development environments. Refer to the provided definitions of security and privacy issues.

If the post raises such concerns, answer **Yes** and briefly justify your decision. Otherwise, answer **No**.

Security: {{Security Description}}

Privacy: {{Privacy Description}}

Post: {{Post Text}}
